

Sound Designer

NIKHL YADAV

I am a creative and technically driven Sound Designer with expertise in crafting immersive audio experiences for games and interactive media. Skilled in sound creation, implementation, and Wwise integration, I pride myself on developing unique sonic identities and working collaboratively with creative teams. My aim is to enhance storytelling through dynamic sound design

EDUCATION

BACHELOR'S DEGREE

Asian University of Manipal, 06/2022 - 04/2025

First grade achieved in modules including:

Music History, Theory, Composition

Diploma Degree

Audio life college of audio engineering,
06/2021 - 04/2022

Dissertation: "The use of DAW for production and sound design, Importance of Acoustics for Audio Engineering, Mic techniques, middleware like Wwise, Fmod, Unreal Engine. Importance and various uses of Foley for post-production and dubbing."

EXPERIENCES

Senior Audio Engineer

Pocket FM, Germany (Remote) / 03/2024 - Present

Leading audio team + hands-on design, recording, and technical audio work

- Partnered closely with producers, writers, and creative leads to define the sonic identity, tone, and style of narrative and immersive audio projects, delivering clear proofs-of-concept that guided full production.
- Designed and implemented soundscapes, original music, ambience, and effects for voice-driven content, ensuring seamless interaction between dialogue, music, and sound design.
- Led pre-production planning, organising original compositions, themes, and curated library assets while anticipating sound design needs early in the workflow.
- Oversaw and supported studio and remote recording sessions, conducting tech checks, audio tests, and ensuring adherence to professional recording standards and file specifications.
- Edited, mixed, and mastered dialogue-centric content for clarity, consistency, and natural pacing, delivering strong V1S and incorporating feedback through efficient revision cycles.
- Composed and produced original music and scoring aligned with narrative intent, emotional tone, and functional listening requirements.
- Mixed and mastered audio to meet platform-specific playback standards, maintaining quality, balance, loudness, and translation across devices and listening environments.
- Managed session organisation, stems, version control, and documentation, enabling smooth collaboration, fast revisions, and reliable delivery under tight deadlines.

My aim is to enhance storytelling through dynamic sound design

EXPERIENCES

Freelance Sound Designer — Games, Film & Interactive Media

03/2024 - Present

Game audio, creature design, implementation, SFX creation

- Created custom SFX libraries for gameplay, UI, and environmental systems.
- Designed creature voices, gibberish speech patterns, and synthetic vocal assets using layered recordings, DSP processing, and granular tools.
- Implemented audio assets in Wwise and Unity, including RTPCs, states, switches, blend containers, randomisation, and interactive music logic.
- Supported small game teams with audio pipeline setup, middleware routing, and engine integration.
- Conducted field recording sessions, prop design, and Foley for cinematic moments and gameplay interactions
- Managed tight production timelines, communicating progress, risks, dependencies, and delivery milestones proactively.
- Maintained highly organized Pro Tools sessions, stems, and documentation to support fast revisions, clean handoffs, and scalable production.
- Performed final quality control across devices and formats, ensuring all assets met professional standards for balance, levels, and playback consistency before release.

QR & SKILLS

- **Logic Pro X**
- **Pro Tools**
- **Reaper**
- **Fmod**
- **Wwise**
- **Unreal Engine**
- **Unity**
