

Sound Engineer

NIKHIL YADAV

Senior Sound Engineer and AI Audio Specialist with 5+ years of experience in full-pipeline audio production for narrative storytelling, short-form content, and interactive media. Proficient in dialogue editing, sound design, Foley, mixing, and mastering across Pro Tools, Logic Pro X, and Adobe Audition. Hands-on experience with generative AI audio tools including ElevenLabs, Suno, and Adobe Firefly Audio for music generation, voice synthesis, and soundscape creation. Skilled in prompt engineering for AI-driven audio workflows and integrating AI-generated assets into professional production pipelines. Passionate about leveraging AI as a force multiplier to deliver immersive, story-driven audio at scale.

EDUCATION

BACHELOR'S DEGREE

Asian University of Manipal, 06/2022 - 04/2025

First grade achieved in modules including:

Music History, Theory, Composition

Diploma Degree

Audio Life College of Audio Engineering,
06/2021 - 04/2022

Dissertation: "The use of DAW for production and sound design, Importance of Acoustics for Audio Engineering, Mic techniques, middleware like Wwise, Fmod, Unreal Engine. Importance and various uses of Foley for post-production and dubbing, Adobe's Audition.

EXPERIENCES

Senior Audio Engineer

Pocket FM, India 05/2023 - Present

Leading audio team + hands-on design, recording, and technical audio work

- Led end-to-end audio production for high-profile titles including Saving Nora, The Alpha's Bride, King of Dragon, and Heart of a Phoenix, as well as crime thriller productions Berlin Crime and Sylt Crime, ensuring each series met professional broadcast standards and a consistent sonic identity.
- Integrated AI-generated audio assets (voice synthesis via ElevenLabs, music via Suno) into production pipelines, reviewing, editing, and refining AI drafts to meet quality and narrative standards.
- Developed and refined prompt engineering workflows for AI audio generation – crafting creation prompts, validation prompts, and quality guardrails that reduced manual sound design time by streamlining repetitive asset generation.
- Collaborated with AI Media Developers and creative leads to ensure AI-generated content remained coherent, tonally consistent, and narratively compelling across episodes.
- Edited, mixed, and mastered dialogue-centric audio for clarity, natural pacing, and platform-specific loudness standards across diverse listening environments.
- Designed and implemented soundscapes, original music, ambience, and SFX for voice-driven short-form content, ensuring seamless interaction between dialogue, music, and sound design.
- Managed session organisation, stems, version control, and documentation to support fast revisions and reliable delivery under tight deadlines.
- Oversaw studio and remote recording sessions, conducting tech checks and ensuring adherence to professional file specifications.

AI AUDIO & GENERATIVE TOOLS

Hands-on experience applying generative AI tools within professional audio production workflows:

- Voice & dialogue synthesis: ElevenLabs – generating, editing, and quality-controlling AI voice assets for narrative content.
- AI music generation: Suno, Udio – creating original background scores and ambient tracks aligned with narrative tone and emotional intent.
- AI audio editing: Adobe Firefly Audio – generating and refining SFX and atmospheric elements to complement human-designed soundscapes.
- Prompt engineering: developed creation prompts and validation prompts for AI audio tools; built guardrails and quality-check flows that improved asset consistency and reduced manual revision cycles.
- Experienced in human review and editing of AI-generated audio drafts – identifying artefacts, tonal mismatches, and pacing issues before final delivery

EXPERIENCES

Sound Engineer Intern

03/2022-04/2024

Game audio, creature design, implementation, SFX creation

- Assisted in audio recording, editing, mixing, and mastering for audio entertainment projects.
- Supported technical setup and workflow management for recording sessions.
- Maintained audio quality standards by identifying and resolving sound issues.
- Worked closely with senior engineers and production teams to ensure smooth project execution.
- Promoted to Senior Sound Engineer for demonstrated leadership, technical expertise, and consistent project delivery.

Skills

- DAWs & Editing: Pro Tools · Logic Pro X · Adobe Audition · Reaper
- AI Audio Tools: ElevenLabs · Suno · Udio · Adobe Firefly Audio
- Middleware: Wwise · Fmod · Unreal Engine · Unity
- Production Skills: Sound Design · Foley · Dialogue Editing · Mixing & Mastering · SFX Creation · Field Recording
- Workflow: Prompt Engineering · AI Asset QA · Session Management · Version Control · Asset Library Management
- Soft Skills: Cross-functional Collaboration · Fast-paced Deadline Management · Team Leadership · Creative Storytelling

Achievements

- Promoted to Senior Sound Engineer for leadership, technical expertise, and consistent project delivery.
- Successfully handled multiple high-volume audio production projects with strict turnaround schedules.
